

# Dr Didge Travel Doo Pro 5

The Travel Doo Pro 5 is an all purpose, full octave multi drone didgeridoo. It consists of 3 hard fibre body parts which are pressed and turned together and 2 aluminium sliders which are collapsible and 1 extra aluminium slider for longer length.

Full setup with 3 body parts key range is A#1-F2 and with extra slider goes down to G#1.

Dr. Didge Dolphin

When the adaptor is added and part 3 is removed key range is C2-A#2.

This gives the didge a yidaki shape and is better for playing higher keys. When the extra slider is added key drops to A#1.
